2018

mit MAD Federsysteme

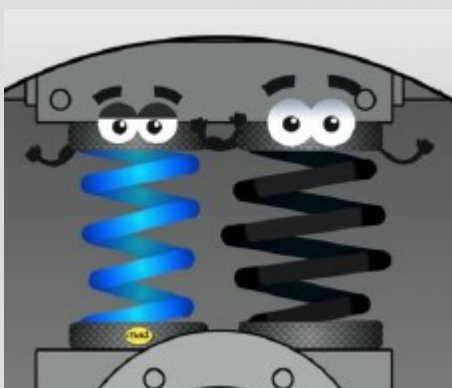

Warum Zusatzfedern ?

- Verbesserte Strassenlage mehr Stabilität
- Erhöhte Fahrsicherheit bei beladenen Fahrzeug
- Reduziert den Durchhang vom Fahrzeugheck

Warum MAD Zusatzfedern ?

- Zuverlässig—MAD Zusatzfedern haben lebenslange Garantie
- Einfache Montage
- Maximaler Höhengewinn bei maximaler Beladung
- Produktion und Entwicklung gemäss den Anforderungen von ISO 9001 und TÜV

MAD Niveaufedern

Um die negativen Effekte von schweren Lasten auszugleichen, hat MAD Niveaufedern entwickelt: Unterstützung der Serienfederung immer dann, wenn es notwendig ist. Unbeladen spürt der Fahrer kaum einen Unterschied. MAD Zusatzfedern bzw. verstärkte Hauptfedern verbessern die Fahreigenschaften erheblich !

Cross Country Höherlegungsfedern sind spezielle Einbausets für alle, die viel im Gelände oder auf schlechten Straßen unterwegs sind. Sie bieten ca. 2 - 6 cm mehr Bodenfreiheit und erlauben es Hindernisse wie Bodenwellen oder auf Schlaglöcher souverän zu bewältigen.

MAD Luftfederung

MAD Basic

Roll oder Doppelfaltenbälge, Luftschlauch, T-Stücke, etc. mit 1 oder 2 Befüllventilen zum Befüllen mit einem Reifenfüller.

MAD Comfort system

Zusatzluftfeder-Satz mit Kompressor und Fahrerhausbedienpaneel. Beide Bälge können unabhängig voneinander bis zum maximalen Druck befüllt und bis zum Minimumdruck wieder entleert werden. Dies hat den Vorteil, dass verschiedene Beladungen ausgeglichen werden können und das Fahrzeug bei Kurvenfahrten immer stabil bleibt.

MAD Smart Air System

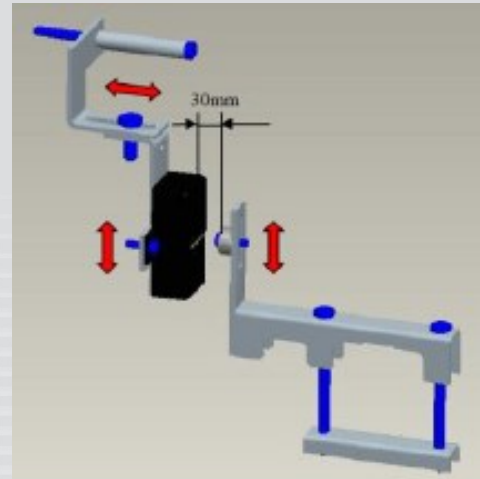

Automatische Niveauregulierung inklusive einem Hochleistungskompressor. Mit diesem System wird Ihr Fahrzeug automatisch auf optimaler Fahrzeughöhe gehalten, egal ob im beladenen oder unbeladenen Zustand.

SmartAir Suspension Automatisches Niveauregulierungssystem

Mit dem SmartAir System behält das Fahrzeug die eingestellte Fahrhöhe unter allen Umständen. Beladen oder unbeladen.

Das System enthält Magnetsensor, ECU-Einheit, Magnetventil, Kabelbaum und SmartAir Kompressor mit Montagehalterung. Halterungen sind speziell für jeden Fahrzeugtyp entwickelt/erhältlich. Das Systems ist an die Luftbälgen angeschlossen, die Fahrzeughöhe wird alle 25 Sekunden durch die ECU-Einheit kontrolliert und ggf. nachjustiert

Warum MAD Smart Air ?

- Verbesserte Fahrstabilität bei beladenen Fahrzeug
- Maximaler Höhengewinn bei maximaler Beladung
- Keine beweglichen Teile, unempfindlich für Schmutz.
- Kein Einfluss des Fahrers möglich.
- Vormontierter Kompressor mit Halterung
- TüV Gutachten
